THE FOREVERMARK STORY

Forevermark is a diamond brand from The De Beers Group of Companies, which has a history of diamond expertise spanning more than 125 years. Forevermark diamonds are the world's most carefully selected diamonds. Each Forevermark diamond comes with a promise that it is beautiful, rare and responsibly sourced. Proof of this promise lies at the heart of every diamond: a unique inscription, invisible to the naked eye. Less than one percent of the world's diamonds are eligible to be inscribed as Forevermark.

Selected for their exceptional qualities, Forevermark diamonds are sourced from a small number of mines that are committed to high business, social and environmental standards - so you can be proud to give and to wear them forever. Only sold in a select group of Authorized Forevermark Jewelers, Forevermark diamonds can be the centerpiece of the jewelry you've always imagined. At Morton and Rudolph we are extremely passionate about the Forevermark brand. In August, owner and Forevermark Carat Club member Jack DeAngelis was taken to the De Beers Victor Mine in Canada. It was here that he experienced the journey of a Forevermark diamond first-hand, a true once in a lifetime experience.

THE FOREVERMARK INSCRIPTION

Every Forevermark diamond is given an inscription that represents the promise that the diamond is beautiful, rare and responsibly sourced. Invisible to the naked eye, this inscription includes the Forevermark icon and the diamonds own unique number. The inscription is 1/20th of a micron deep (1/5000th the depth of a human hair), and is placed on the table of the diamond using proprietary technology developed by The De Beers Group of Companies.

Forevermark helps to fund vital projects that protect and nurture the beauty and diversity of the natural world. In Botswana, Jwaneng mine operates a 42,008 acre Game Park, which is home to more than 1,700 animals and hosts a field unit for Cheetah Conservation in Botswana.

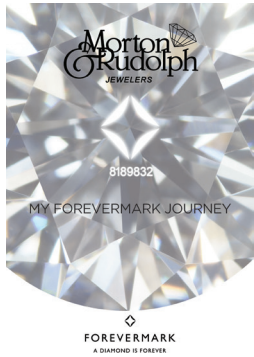

In South Africa, The De Beers Group of Companies owns and co-funds The Diamond Route, a series of nine beautiful, protected destinations around their traditional areas of operation and mining. Along The Diamond Route, various conservation, research and breeding programs contribute to monitor and protect wild animals.

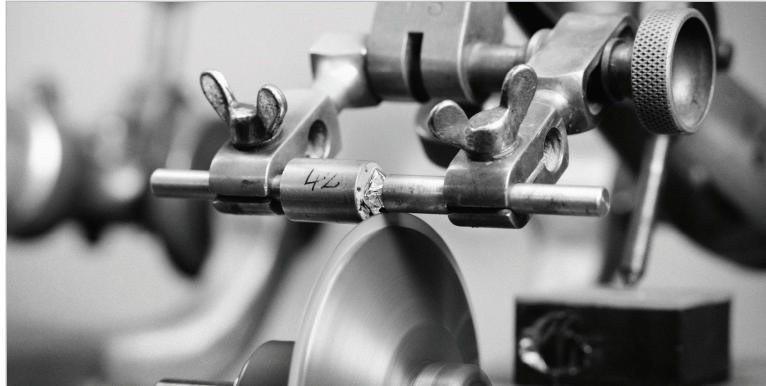

Forevermark supports a series of enterprise development funds, such as the De Beers Zimele fund. In 2014, Zimele benefited over 62 small and medium-sized businesses in South Africa, creating over 1,175 jobs in farming, jewelry, design, food distribution, and other sectors. Over a third of the people who benefited directly from that funding were women.

Forevermark helps provide healthcare and free education for all its employees, their families and surrounding communities. In South Africa, more than 3,000 students have benefited from the Khula Weekend School set up by The De Beers Group of Companies to help employees' children as well as children from communities surrounding mining areas in South Africa.

THE FULL BOOK WILL
BE SHOWN IN PERSON

BEYOND THE 4Cs

Forevermark goes beyond the standard 4Cs to select those that are among the finest and most beautiful diamonds in the world. Forevermark selects truly beautiful diamonds based on three key criteria that go beyond the 4Cs. The rough diamond itself must be of superior quality even before it is cut and polished. Once a diamond arrives at the Forevermark Diamond Institute to be evaluated, the diamond's polish must have a high degree of transparency to reflect and refract light. The diamond's cut must be precise enough to result in both outstanding symmetry and durability.
